Sponsored Programs: A to Z

**Friday, November 7, 2014
11:00-12:00pm**

Presented by Kacie Flynn, SPF Staff

The HSU Sponsored Programs Foundation's primary mission is to advance HSU research & economic development in collaboration with our regional and global partners. They administer virtually all externally funded grants and contracts as well as submit proposals to external funding agencies on behalf of the University. Some of their grant and contract services include:

- Assist faculty and staff in identifying funding sources
- Oversee institutional routing process for submitting proposals
- Administer various campus small grant and incentives programs

USING GRANT DATABASES TO FIND FUNDING

September 26, 2014
Research Workshop Series

FOUNDATION DIRECTORY O N L I N E

<https://fconline.foundationcenter.org/>

An independent nonprofit information clearing-house that collects, organizes, analyzes, and disseminates information on foundations, corporate giving, and related subjects.

- Over 130,000 foundations, corporate donors, and grantmaking public charities
- 3 million recent grants listed
- More than half a million trustee, officer, and donor names
- Program details and application guidelines for leading grantmakers

SPIN, an extensive research funding opportunity database containing over 40,000 funding opportunities from more than 10,000 sponsors.

- Access funding information online, from any browser
- Gain access to a large keyword list, allowing for greater flexibility in your searches

Search Tip for SPIN

Inserting a tilde ~ before a quoted phrase searches for records containing the phrase 'scientific research' or its related terms in the thesaurus.
Example: ~"Scientific research"

Foundation Directory — Unique Boolean

The NEAR Operator

Including NEAR/n between two index entries, words, or phrases narrows an "and" operator search, retrieving results containing *both* of the index entries selected or words or phrases typed but only if they appear within a specific proximity to one another. The "n" should be a numerical value indicating the maximum number of words that should appear between two index entries, words, or phrases. For example, typing *arts NEAR/3 culture* into the Keyword Search field on the Search Grantmakers Screen will retrieve grantmaker records containing both "arts" and "culture" but only if they appear no more than three words away from one another.
