

## **Student Internships Now Available**

### **Watershed Management Experiential Learning for USDA Careers**

WRPI received a 4-year award for \$2 million that Cal State San Bernardino is sharing with CSU's fourteen other Hispanic-Serving Institutions including Humboldt State University.

The strategic goal of this project is to measurably increase student research skills that ensure our national forests and private working lands are conserved, restored, and made more resilient to climate change, while simultaneously enhancing the sustainability of the Nation's water resources. To learn more about the program and how to participate visit:

ExperientialLearning.html](http://wri.csusb.edu/watershedManagementExperientialLearning.html)

These internships are aimed at students in the following primary disciplines and subject matter areas:

- Water Science/Water Resources
- Environmental Sciences/Management
- Conservation
- Renewable Energy & Natural Resources including Forestry and Ecology/Wetlands
- Biological Sciences
- Biotechnology
- Biochemistry & Microbiology
- Plant Sciences & Horticulture including Turf Sciences
- Agricultural/Biological Engineering
- Agricultural Social Sciences & Soil Science

These disciplines will prepare students for occupations which the USDA Office of Human Capital Management has identified as Mission Critical, including Forestry Technician, General Biological Scientist, Biological Science Technician, Soil Conservation Specialists, Forestry & Soil Science Specialist and more.
