(COMAP)**

Mathematics Across the Disciplines

The National Science Foundation has funded seven major projects in a program entitled, "Mathematics Across the Disciplines." The purpose of the program is to change the way undergraduate education is designed and executed. The NSF criteria called for institution-wide reform and models for changing the culture at the schools awarded grants under the program. The seven projects currently underway will be described. One of the projects is entitled, "Project Intermath," a consortium of 15 schools led by West Point and COMAP. The objectives of Intermath include developing "Interdisciplinary Lively Applications Projects," initiating an Interdisciplinary Modeling Contest, and six major curriculum projects. Products from Project Intermath will be demonstrated.

Thursday, December 3, 1998

7:00 p.m., Founder's Hall 118
